PRODUCTS BY APPLICATION

CARB LEGAL

Powerteq is committed to environmental initiatives including emissions-compliant products and services across its entire portfolio. To that end, Powerteq has invested significantly in the following programs: in-house laboratory emissions testing equipment and technicians, California Air Resources Board (CARB) emissions certification testing, alternative fuels research, and fuel economy studies.

Powerteq expects to achieve full emissions compliance certification in 2014.

Under Federal law, it is illegal to install any emissions-related component, if it defeats or will "render[s] inoperative any device or element of design installed" on an otherwise certified motor vehicle or engine.
